**Isola
Collection**

Shaping horizon

Like a land rising from water, Isola emerges in the kitchen. Technology made visible, light that draws volume, materials that deepen presence. A quiet landmark that defines a new landscape with grace and intention.

Isola does not ask for attention, it attracts it. It stands not as an object, but as a quiet landmark in the landscape of the home.

A horizon drawn in glass and metal, where light slides gently across softened edges; a surface that becomes a spatial gesture; a subtle architecture that orients the room and invites life to gather around it.

Architecture of Presence

A line, a surface, a suspended volume

Hobs, hoods, and lighting rail form a coherent system: a luminous axis above, a grounded plane below, and air shaped in between: function becoming architecture, atmosphere becoming design.

A dialogue between technology, architecture, and light

Every element of Isola is designed with architectural intention. The softened edges trace a continuous, fluid silhouette that invites touch and defines a gentle visual rhythm.

Light becomes a decisive signature: not decoration, but a structural element that frames the surface, reveals the material, and guides the user.

Timeless materials
and tactile
contrasts come
together to create
a contemporary,
sensorial elegance.

The choice of materials reinforces this vision. Anodised aluminium in a stainless-steel hue, an iconic hallmark of SMEG, reasserts its expressive strength and timeless luminosity, while black glass introduces a contemporary, sophisticated, tactile note. The balance between the glossy glass surface and the satin frame resonates with current living trends, increasingly oriented towards discreet elegance and heightened sensoriality.

Hobs, platform for rituals

Behind its sculptural look, Isola conceals a sophisticated technological core designed to enhance everyday rituals. Performance does not compromise beauty, it completes it to turn Isola into a system where design shapes experience, and technology follows human gestures with elegance and intention.

Alta Pro range

Light that guides. Technology that anticipates. The motorized downdraft hood ascends like a silent performance, the LED frame glows like a halo, and the 5" TFT display illuminates with intuitive clarity. GenX technology refines every gesture: precise cooking, gentle sound, effortless transitions.

80 cm Induction Hob

Light and frame
4 zones - 1 Multizone
TFT colour display
Induction GenX
Follow Pot function
Cooking support functions

Product code:

SISL7845X - Inox

SISL7845MB - Matt Black

83 cm Hood in Hob, Induction

Light and frame
4 zones - 2 Multizones
TFT colour display
Induction GenX
Follow Pot function
Cooking Support Functions
Downdraft hood with 8 cm of elevation
Brushless blower: 620 m³/h

Product codes:

HHSL7845MB - Matt Black

90 cm Induction Hob

Light and frame
5 zones - 2 Multizones
TFT colour display
Induction GenX
Follow Pot function
Cooking support functions
The central zone reaches up to 5.5 kW

Product codes:

SISL7955X - Inox

SISL7955MB - Matt Black

A dialogue of light, curves and presence

Cool-touch thermal efficiency

The MultiZone function adapts the cooking surface to any needs: a simple gesture combines two zones into one, easily accommodating even the largest pots.

Smart heat control

Keep full control while moving pots freely: FollowPot function maintains settings and auto-detection ensures precise heat for effortless, flexible cooking.

Easier way of cooking

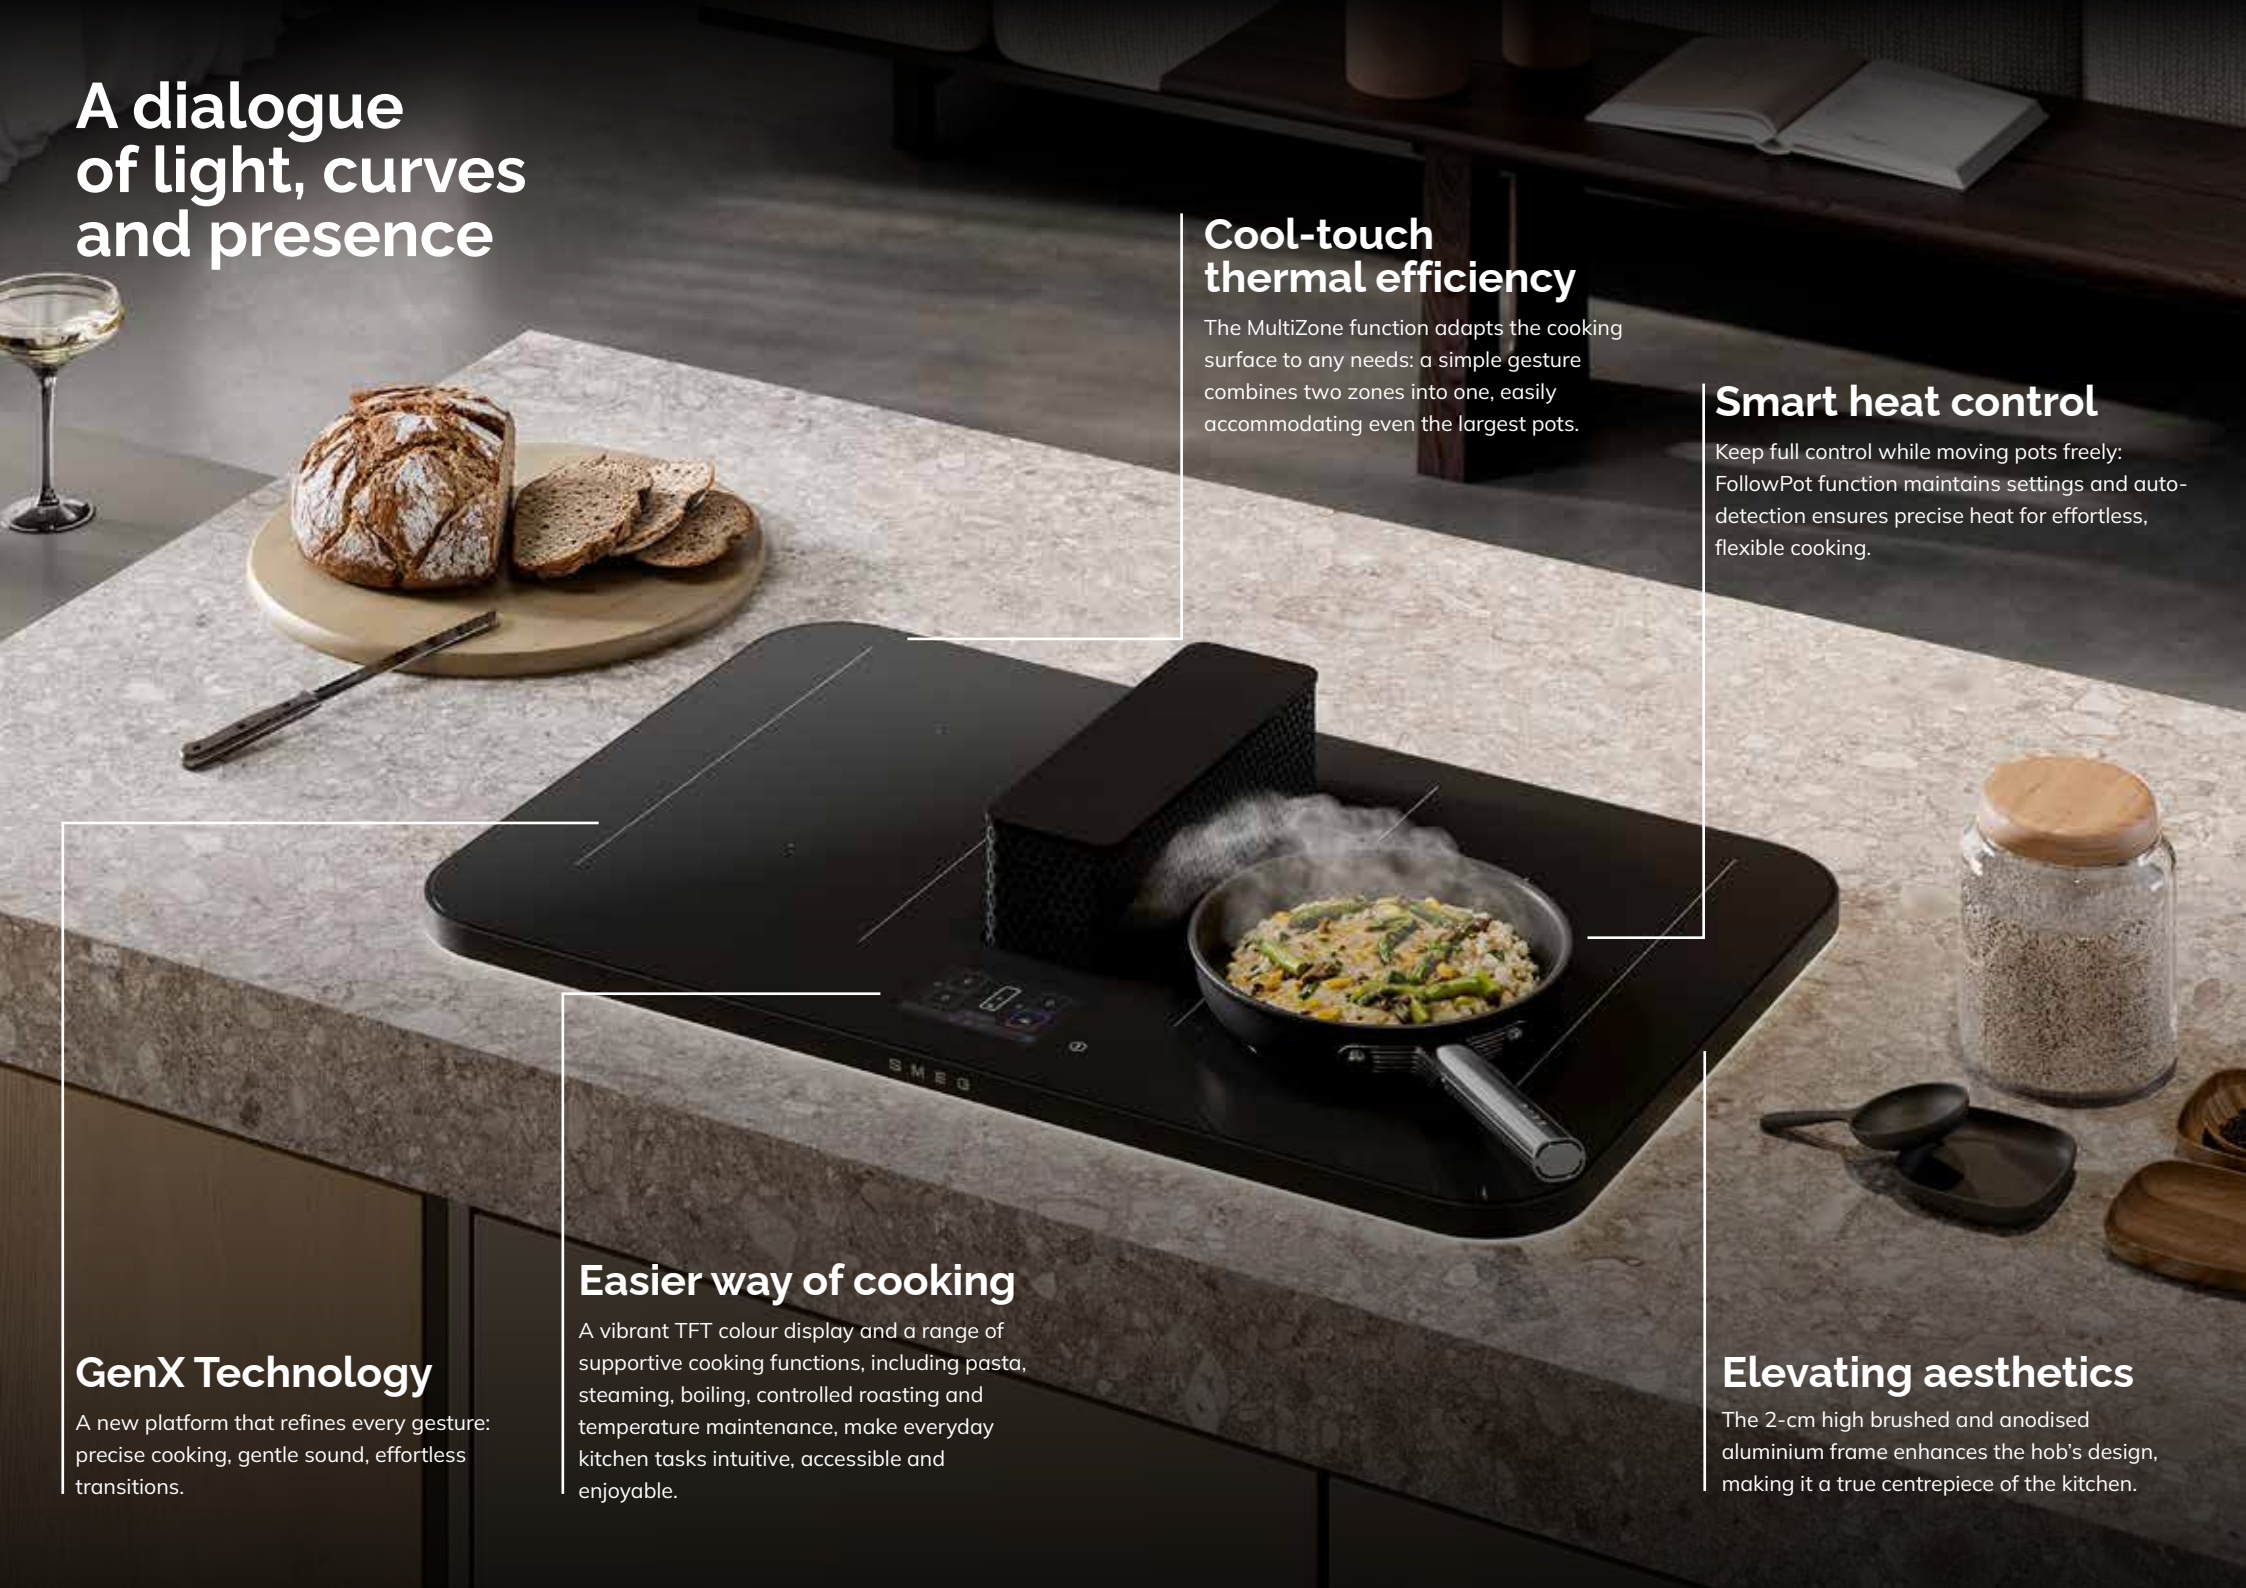

A vibrant TFT colour display and a range of supportive cooking functions, including pasta, steaming, boiling, controlled roasting and temperature maintenance, make everyday kitchen tasks intuitive, accessible and enjoyable.

GenX Technology

A new platform that refines every gesture: precise cooking, gentle sound, effortless transitions.

Elevating aesthetics

The 2-cm high brushed and anodised aluminium frame enhances the hob's design, making it a true centrepiece of the kitchen.

Alta Range

The range introduces a new depth of expression, a visible design statement that gives a sophisticated rhythm to the kitchen. It is a solution that goes beyond traditional integrated hoods, delivering superior performance and a striking, architectural aesthetic.

80 cm Induction Hob

Frame

4 zones - 1 Multizone

Hoods, Design and Performance

Like a quiet architectural gesture, the Isola hoods redefine the space above the kitchen with precision and lightness. Their volume shapes air and atmosphere with subtle authority, merging refined design with advanced aspiration technology to create a seamless, elevated experience.

Suspended Hoods

Designed as strikingly contemporary objects, the suspended hoods enhance the space with clean lines and essential surfaces, bringing design and functionality together.

100 cm Hood

Airflow: 620 m³/h

Anti-condensation system

10 cm body height

Touch on metal display

Perimetral aspiration

Upper and lower lights

Product codes:

KSLS10X - Inox

KSLS10MB - Matt Black

180 cm Hood

Airflow: 620 m³/h

Anti-condensation system

10 cm body height

Touch on metal display

Perimetral aspiration

Upper and lower lights

KSLS18X - Inox

KSLS18MB - Matt Black

Shaping new perspectives

Signature sleek design and efficient filtration

The metallic grease filter effectively captures cooking residues, ensuring cleaner air and easy maintenance while keeping the kitchen clean.

Extra display space

Glass shelves provide additional room to showcase items, keeping your kitchen organized while adding a touch of elegance and practicality.

Personalized lighting

Tunable upper and lower lighting allows customizable illumination with different color settings, letting to perfectly tailor the kitchen's lighting to the desired mood.

No more condensation

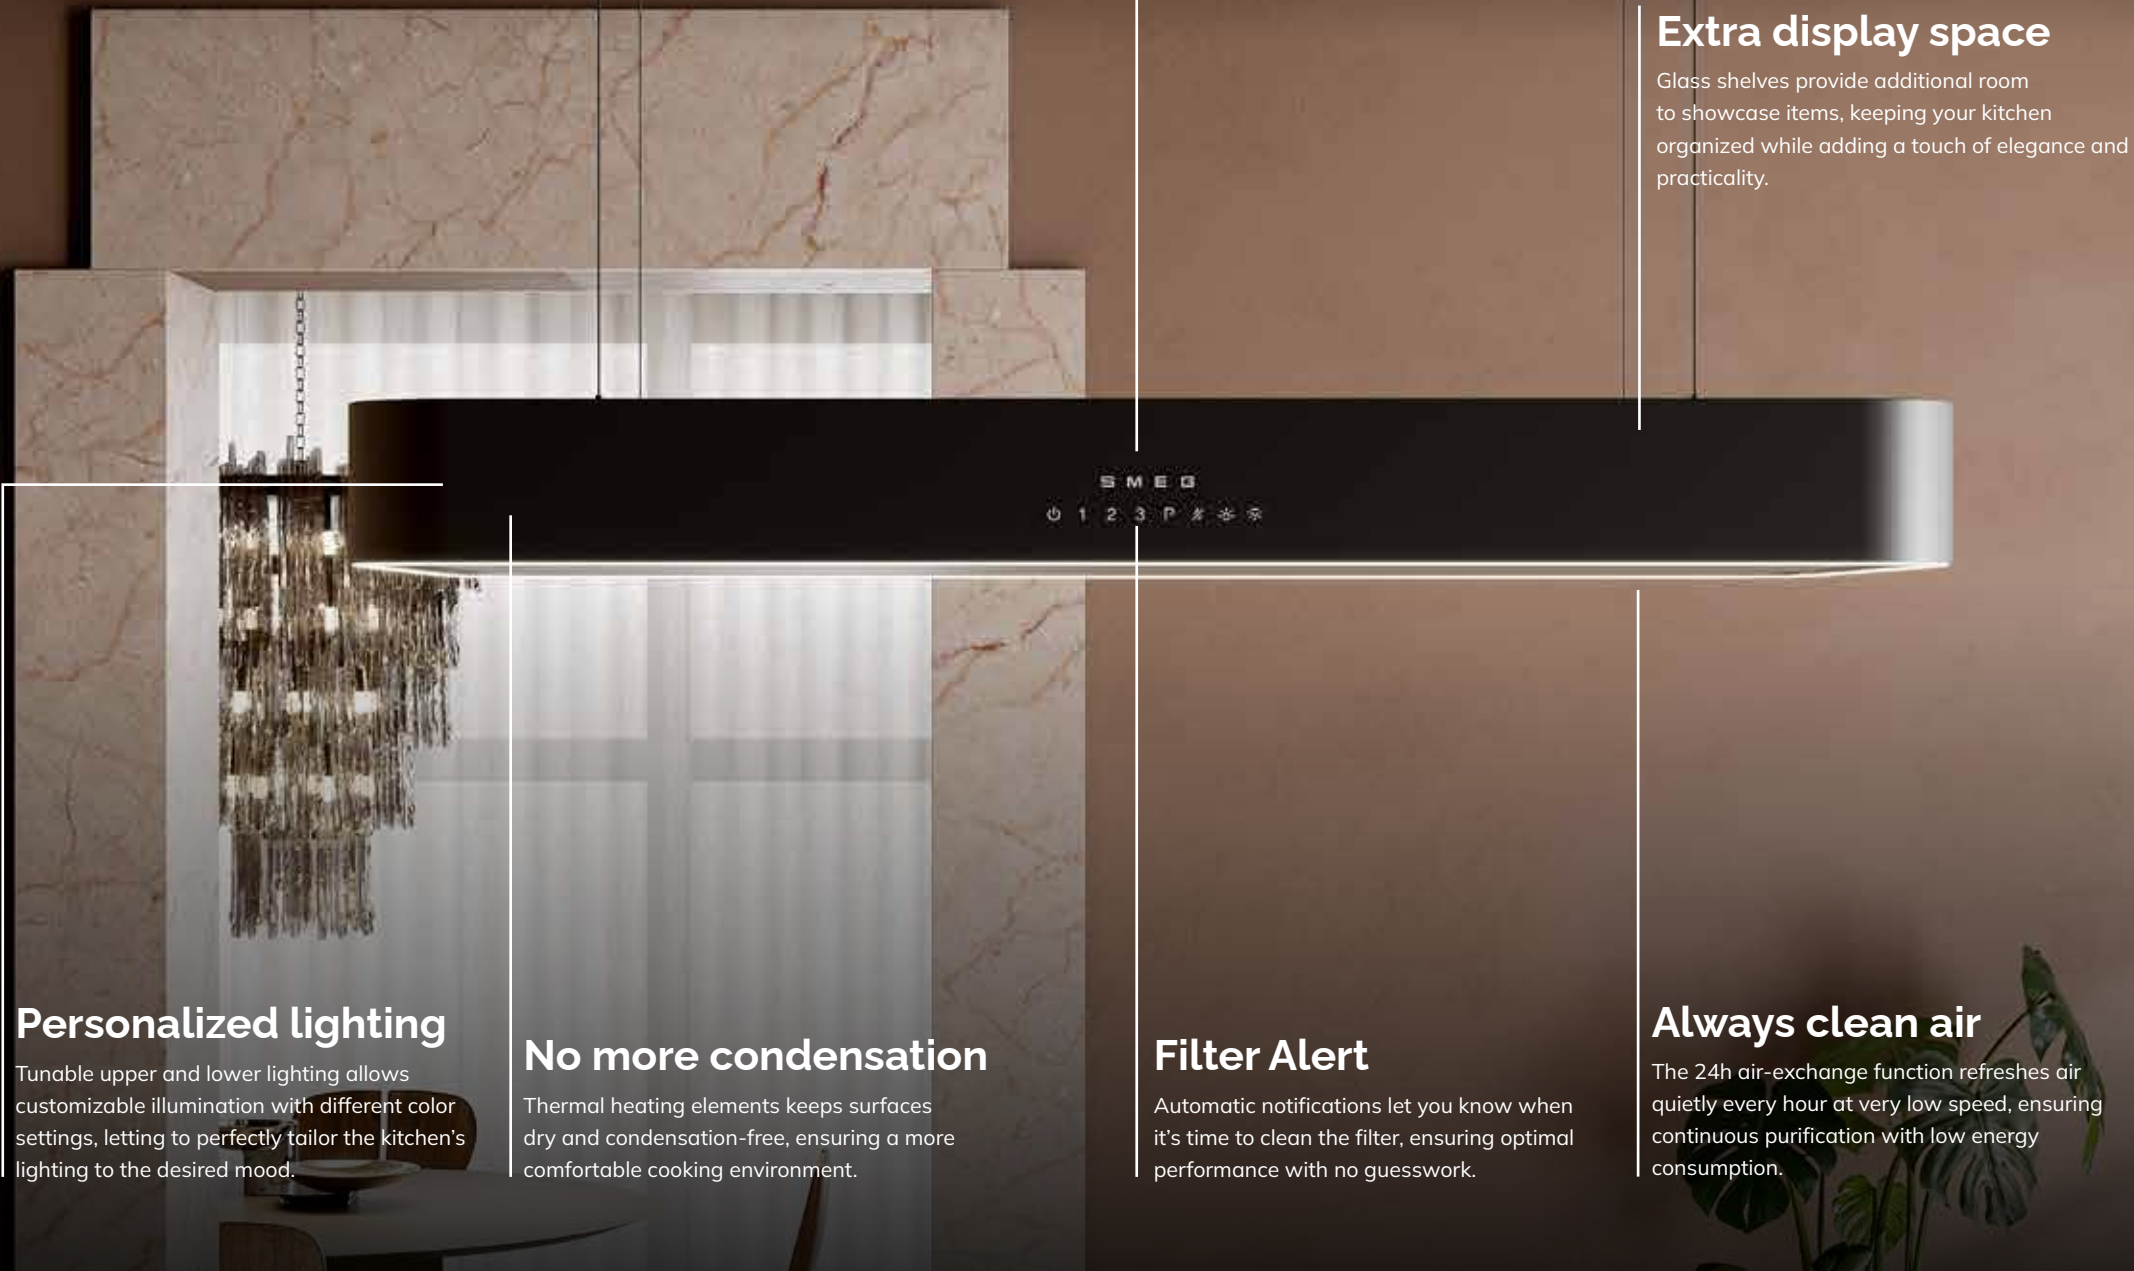

Thermal heating elements keeps surfaces dry and condensation-free, ensuring a more comfortable cooking environment.

Filter Alert

Automatic notifications let you know when it's time to clean the filter, ensuring optimal performance with no guesswork.

Always clean air

The 24h air-exchange function refreshes air quietly every hour at very low speed, ensuring continuous purification with low energy consumption.

Lighting rail, a line that shapes space

Suspended as a quiet, linear gesture, the Isola lighting rail draws a luminous line through the kitchen, defining perspective. Its continuous, tunable light becomes an architectural axis, subtle, responsive, and designed to shape the atmosphere with a single movement.

Lighting Rails

Like a trace of light that defines the atmosphere, the lighting rail brings a new form of expression to the kitchen: a linear gesture, suspended and soft, capable of shifting mood with a simple movement of the hand.

180 cm Light Ray

Gesture control

Dimming and tunable

5 m of continuous light (linear)

Product codes:

LSLS18X - Inox

LSLS18MB - Matt Black

Suspended hoods and lighting rails - elegance that illuminates the space

The light rail can be used as a stand-alone system to illuminate the entire kitchen, or it can be perfectly combined with the hood to create a seamless, harmonious design.
